

SiGr01

Film Type

SHADE FILM

DESCRIPTION

The SiGr01 film is the highest performing transparent film of our range and offers excellent heat and glare protection. With this film the highest possible savings in cooling energy can be achieved. To ensure the stability of the film as well as the entire sun protection system, the film is embossed and pleated as standard, which also gives it excellent visual elegance.

Application

INTENDED USE

The SiGr01 is suitable for almost all installation situations. Especially for office buildings with computer workstations, CAD workstations or in lecture rooms, the SiGr01 is used. The film is also very suitable for rooms on the east or west side where glare is caused by a low sun.
