## SHADE FILM

---

### DESCRIPTION

This SiWh00 film offers excellent heat and glare protection. It is the most performing film of all RETROLUX shade films. This film is suitable for full darkening and thus also offers one hundred percent privacy protection. This film achieves the highest possible savings in energy costs for cooling. To ensure high stability of the film as well as the entire sun protection system, the film is embossed and pleated as standard, which also gives it excellent visual elegance.

UV-rejection

Indoor blinds  
Application

### INTENDED USE

---

The SiWh00 film is particularly suitable when a complete blackout film is desired. This film is used in office buildings with VDU workstations, CAD workstations or in lecture rooms. The film is also very suitable for rooms on the east or west side where glare is caused by a low sun.
